Super, thanks. We are tentatively having an "abbreviated" workshop in late Feb. Plan is to deliver the Ron GWPS slide portion to CA operators. Will have state folks there to explain their process, and they will host. All tentative right now.

Thanks...one more additional note: Wendy Cheung provided Lisa M. some useful comments on the CA AE workshop draft agenda, so you should be seeing those soon.

Hi Douglas,

I don't want to offer anything we cannot follow thru with, but we have a former employee we use on a contract basis that might be a possible review resource, but that costs \$\$\$. Also, Nancy Rumrill as the permit writer for our Class III permit might be able to help. The hearing is tomorrow and the public comment period is thru mid March so there is not much to do after tomorrow, but that is David's call. I am copying him, and you two can follow up.

Michele

Thanks Michelle: I think Valois has had a chance to look at these documents as our Class III ISR permit writer.

As an aside, we are interested in having an experienced person in the Regions do a technical review of our first Class III uranium ISR draft permit for the Dewey Burdock project. However, I can only imagine how busy everyone is in your office right now. I am also soliciting R6's help on this project.

Douglas

Subject: Region 9 Class III DI permit

Hi Douglas,

As a follow up from the UIC Manager call, below is a link to some specific information regarding the proposed Class III permit in AZ. The entire draft permit file is on the Region 9 website; this is the Statement of Basis:

<http://www.epa.gov/region9/water/groundwater/uic-pdfs/az/r9uic-az3-fy11-1-draft-permit-statem-of-basis-2014.pdf>

Nancy Rumrill is the permit writer.

Sincerely,

Michele
